Packaging index

Information about our packaging

January 2026

Contents

This index provides concise information on the labelling, weight, dimensions and packaging types of our products. It helps you comply with legal requirements and facilitates internal processes, customer communication and correct allocation for disposal.

*Please note the identification code and type of material, as well as the disposal options applicable in your municipality. As a general rule, all packaging components must be disposed of separately.

Working together for a sustainable future

With this index, we are contributing to transparency, efficiency and environmental responsibility. Its careful application not only supports legal requirements, but also our common goals for resource conservation and the circular economy.
By complying with standards together, we reduce waste, promote recycling and actively contribute to protecting our environment.

Thank you for your support!
