### Rutronik presents XP™-Series by Nesscap

**Ispringen, 21. August 2017** – Durable and top-performing even under adverse conditions: Nesscap's new XP™-series has been specially engineered for applications that operate over long durations in environments with high temperature and humidity.

Under the 'Biased Humidity Test' conditions (2.7 V, 90% relative humidity, 60 °C), Nesscap's new XP™-series stands out with a significantly longer service life under direct current conditions in comparison with standard cells.

XP™ products are offered at capacitance ranging from 3F to 50F with dimensions and electrical specifications identical to those of Nesscap's corresponding standard cells. The XP™-series features patented closure and contact technology. All products have been extensively tested to ensure adherence to strict performance standards and are compliant with RoHS, UL and REACH. The XP™-series is rated for temperatures between -40 °C and +65 °C and provides a long cycle stability for at least 500,000 charging / discharging cycles.

About Rutronik ([www.rutronik.com](http://www.rutronik.com))

Rutronik Elektronische Bauelemente GmbH is the third largest distributor in Europe (European Distribution Report 2016) and the number ten worldwide (SourceToday, May 2017). The broadline distributor supplies semiconductors, passive and electromechanical components as well as boards, storage, displays & wireless products. The company's primary target markets are the automotive, medical, industrial, home appliance, energy and lighting industries. The ranges RUTRONIK **EMBEDDED**, RUTRONIK **SMART**, RUTRONIK **POWER** and RUTRONIK **AUTOMOTIVE** provide customers with specific products and services in groups tailored to the respective applications. Expert technical support for product development and design-in, individual logistics and supply chain management solutions as well as comprehensive services complete its scope of performance.

The company, founded by Helmut Rudel in 1973 in Ispringen, Germany, now has over 70 subsidiaries in Europe, Asia and the Americas. Rutronik employs more than 1,500 staff worldwide and achieved Group sales of 872 million euros in the fiscal year 2016.

The [rutronik24.com](http://rutronik24.com) eCommerce platform gives users access to the online catalog, the Procurement Area and the Product Change Notifications (PCNs) with just a single login. The online catalog provides an overview of all products including detailed data sheets, and intelligent search functions make selection easier. The ‚mass quotation‘ link allows customers to use their parts list for convenient purchasing. In the Procurement Area, customers can obtain a quick overview of their current and past orders, tenders, article lists, safety stock level, contracts, consignment stock and traceability. The current catalogs, procurement information, PCNs and also a wide range of media are available for downloading.
