

# PAN1326C2

Bluetooth® Basic Data Rate and Low Energy Module  
Design Guide

Rev. 1.1

## Overview

Panasonic's new PAN1326C2 is a Host Controlled Interface (HCI) Bluetooth® Radio Frequency (RF) module that brings Texas Instruments™ seventh generation Bluetooth core integrated circuit, the CC2564C, to an easy to use module format. The PAN1326C2 is Bluetooth 5.1 compliant and it offers best-in-class RF performance with about twice the range of other Bluetooth Low Energy (LE) solutions. Panasonic's tiny footprint technology has produced a module of only 85.5 mm<sup>2</sup>. The module is designed to accommodate PCBs pad pitch of 1.3 mm and as few as two layers for easy implementation and manufacturing. The module has been designed to be 100 percent pin-compatible with previous generations of Texas Instruments based Bluetooth HCI modules.

## Bluetooth

- Scatternet and piconets simultaneously
- Synchronous Connection Oriented (SCO) links on the same piconet
- Support for All Voice Air-Coding – Continuously Variable Slope Delta (CVSD), A-law,  $\mu$ -law, modified Subband Coding (mSBC), and transparent (uncoded)
- Assisted mode for HFP 1.6 Wideband Speech (WBS) profile or A2DP profile to reduce host processing and power
- Support of multiple Bluetooth profiles with enhanced QoS
- Multiple sniff instances tightly coupled to achieve minimum power consumption

- Independent buffering for LE allows large numbers of multiple connections without affecting BR or EDR performance
- Built-in coexistence and prioritization handling for BR, EDR, and LE
- Capabilities of link layer topology Scatternet (can act concurrently as peripheral and central)
- Network support for up to 10 devices
- Time line optimization algorithms to achieve maximum channel utilization

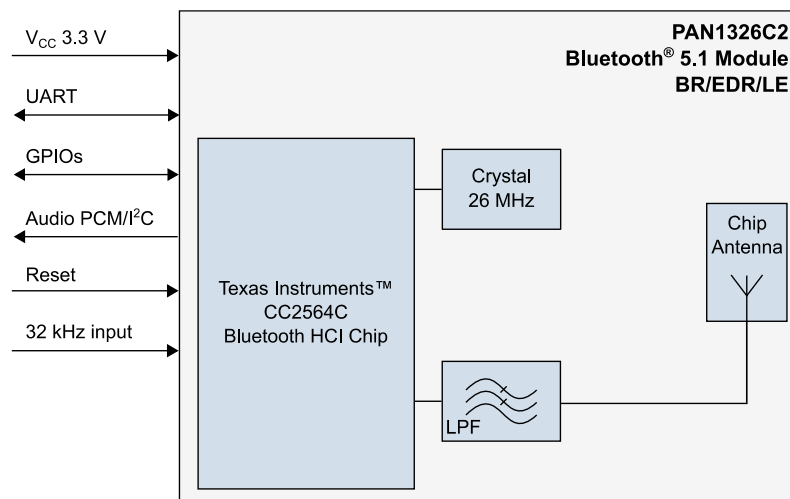

## Features

- Bluetooth 5.1 compliant up to the HCI layer
- Best-in-class Bluetooth RF performance (Tx, Rx sensitivity, blocking)
- Dimensions: 9 mm x 9.5 mm x 1.8 mm
- Based upon Texas Instruments CC2564C
- Interfaces: UART, GPIO, PCM

## Characteristics

- Bluetooth 5.1
- Receiver sensitivity: -90 dBm
- Output power: 8 dBm
- Power supply: 1.7 V to 4.8 V
- Power consumption: Tx 40 mA
- Power consumption: Rx 20 mA
- Operating temperature range: -40 °C to 85 °C

## Engineering Samples (ES)

If Engineering Samples are delivered to the customer, these samples have the status "Engineering Samples". This means that the design of this product is not yet concluded. Engineering Samples may be partially or fully functional, and they may differ from the published Product Specification.

Engineering Samples are not qualified and they are not to be used for reliability testing or series production.

### Disclaimer

The customer acknowledges that samples may deviate from the Module Integration Guide and may bear defects due to their status of development and the lack of qualification mentioned above.

Panasonic rejects any liability or product warranty for Engineering Samples. In particular, Panasonic disclaims liability for damages caused by:

- The use of the Engineering Sample other than for evaluation purposes, particularly the installation or integration in another product to be sold by the customer,
- Deviation or lapse in function of the Engineering Sample,
- Improper use of the Engineering Sample.

Panasonic Industrial Devices Europe GmbH disclaims any liability for consequential and incidental damages. In case of any queries regarding the Engineering Samples, please contact your local sales partner or the related product manager.

The information contained herein is presented only as guidance for Product use. No responsibility is assumed by Panasonic for any infringement of patents or any other intellectual property rights of third parties that may result from the use of Product. No license to any intellectual property right is granted by this document, whether express or implied, by estoppel or otherwise.

Description of hardware, software, and other information in this document is only intended to illustrate the functionality of the referred Panasonic product. It should not be construed as guaranteeing specific functionality of the product as described or suitable for a particular application.

Any provided (source) code shall not be used or incorporated into any products or systems whose manufacture, use or sale is prohibited under any applicable laws or regulations.

Any outlined or referenced (source) code within this document is provided on an "as is" basis without any right to technical support or updates and without warranty of any kind on a free of charge basis according to § 516 German Civil Law (BGB) including without limitation, any warranties or conditions of title, non infringement, merchantability, or fitness for a particular purpose. Customer acknowledges that (source) code may bear defects and errors.

The third-party tools mentioned in this document are offered by independent third-party providers who are solely responsible for these products. Panasonic has no responsibility whatsoever for the performance, product descriptions, specifications, referenced content, or any and all claims or representations of these third-party providers. Panasonic makes no warranty whatsoever, neither express nor implied, with respect to the goods, the referenced contents, or any and all claims or representations of the third-party providers. To the maximum extent allowable by Law Panasonic assumes no liability whatsoever including without limitation, indirect, consequential, special, or incidental damages or loss, including without limitation loss of profits, loss of opportunities, business interruption, and loss of data.

# 1 About This Document

## 1.1 Purpose and Audience

This Design Guide is intended to support the easy integration of the PAN1326C2 into a product and to ensure the compliance with regulatory requirements. This guide gives an overview about the hardware design requirements by providing a reference design.

It is intended for hardware design, application, and Original Equipment Manufacturers (OEM) engineers.

The product is referred to as “the PAN1326C2” or “the module” within this document.

## 1.2 Revision History

Revision	Date	Modifications/Remarks
1.0	2019-11-08	First version
1.1	2020-12-02	Updated chapter “Placement Recommendation”. Updated Bluetooth version (Bluetooth 5.1). Corrected order number. Added chapter “Restricted End Use”. New design, structure, and disclaimer.

## 1.3 Use of Symbols

Symbol	Description
	<b>Note</b> Indicates important information for the proper use of the product. Non-observance can lead to errors.
	<b>Attention</b> Indicates important notes that, if not observed, can put the product’s functionality at risk.
	<b>Tip</b> Indicates useful information designed to facilitate working with the module and software.
⇒ [chapter number] [chapter title]	<b>Cross Reference</b> Indicates cross references within the document. <b>Example:</b> Description of the symbols used in this document ⇒ 1.3 Use of Symbols.

### 3 PAN1326C2 Module

#### 3.1 Block Diagram

## 3.2 Placement

### Antenna “Keep out Area”

Do not place any ground plane under the marked restricted antenna area in any layer! This would be affecting the performance of the chip antenna in a critical manner.

### Impact of Placement on the Antenna Radiation Pattern

The placement of the module, surrounding material, and customer components has an impact on the radiation pattern of the antenna.

The recommendation for the ground plane is based on a FR4 4-Layer PCB.

The following requirements must be met:

- ✓ Keep this product away from heat. Heat is the major cause of decreasing the life of these products.
- ✓ Keep this product away from other high frequency circuits.

The antenna requires a cutout area of 5 mm × 3 mm under the PAN1326C2 module. This “Keep out Area” shall be located in every layer under the module antenna. Note for example the “Keep out Area” in all four layers of the PAN1326C2 evaluation board.

It is recommended to verify the perfect position of the module in the target application before fixing the design.

All dimensions are in millimeters.

Use a ground plane in the area surrounding the module wherever possible.

It is recommended to place the module:

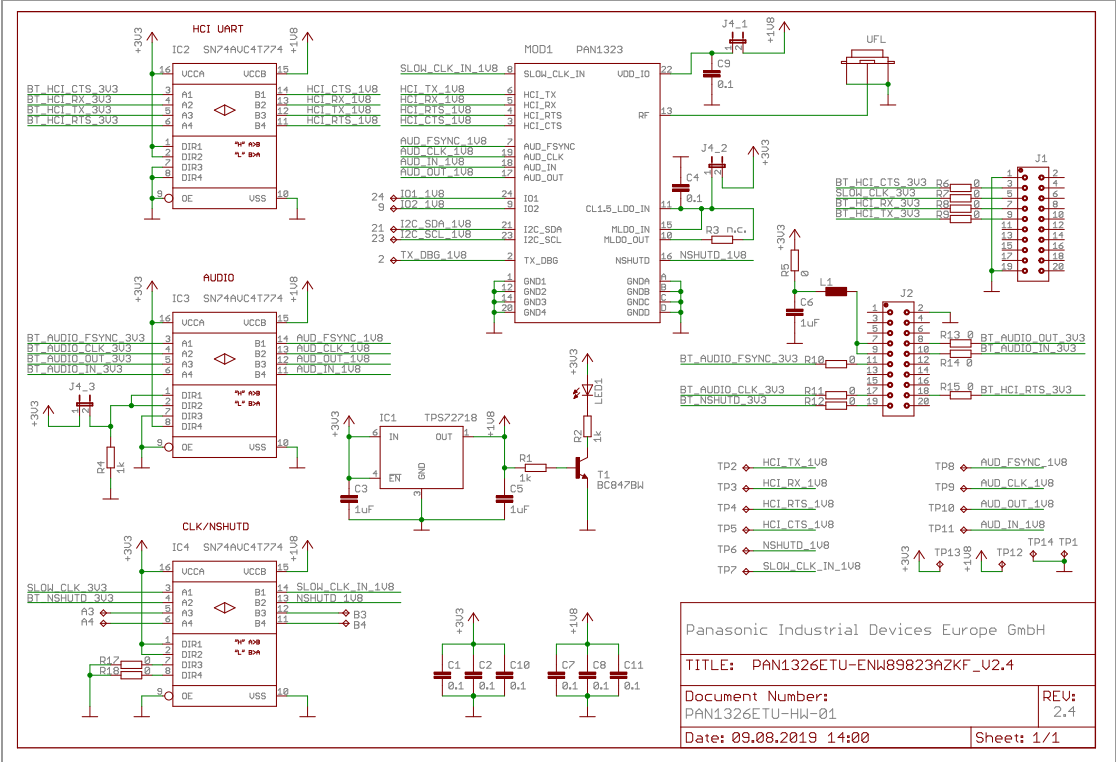

- In the center (horizontal) of mother PCB.
- At the edge (horizontal) of mother PCB.

### Antenna Placement Recommendation

# 4 Reference Design

## 4.1 Schematic

### 4.4 EM Adapter BoosterPack

 If the adapter board is purchased directly via Texas Instruments or a related distributor, the crystal oscillator next to C7 is not equipped. Please be aware, that in this case the 32 kHz slow clock is missing and must solder on the board.

## 4.5 MSP432 Launchpad

For detailed information about the installation and tools, please refer to the Texas Instruments website <http://www.ti.com/>.

## **5 Restricted Use**

### **5.1 Life Support Policy**

This Panasonic Industrial Devices Europe GmbH product is not designed for use in life support appliances, devices, or systems where malfunction can reasonably be expected to result in a significant personal injury to the user, or as a critical component in any life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

Panasonic customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Panasonic Industrial Devices Europe GmbH for any damages resulting.

### **5.2 Restricted End Use**

This Panasonic Industrial Devices Europe GmbH product is not designed for any restricted activity that supports the development, production, handling usage, maintenance, storage, inventory or proliferation of any weapons or military use.

Transfer, export, re-export, usage or reselling of this product to any destination, end-user or any end-use prohibited by the European Union, United States or any other applicable law is strictly prohibited.

## 6 Appendix

### 6.1 Ordering Information

#### Variants and Versions

Order Number	Brand Name	Description	MOQ <sup>1</sup>
ENW89819AYKF	Experimenter Kit	1× PAN1326C2 Breakout Board 1× Texas Instruments MSP430 Launchpad 1× Texas Instruments Boost/CCEMAdapter	1
ENW89819AXKF	1326C2 Breakout Board	1× PAN1326C2 Breakout Board	1

---

<sup>1</sup> Abbreviation for Minimum Order Quantity (MOQ). The default MOQ for mass production is 1 500 pieces, fewer only on customer demand. Samples for evaluation can be delivered at any quantity via the distribution channels.

## 6.2 Contact Details

### 6.2.1 Contact Us

Please contact your local Panasonic Sales office for details on additional product options and services:

For Panasonic Sales assistance in the **EU**, visit

<https://eu.industrial.panasonic.com/about-us/contact-us>

Email: [wireless@eu.panasonic.com](mailto:wireless@eu.panasonic.com)

For Panasonic Sales assistance in **North America**, visit the Panasonic website “Sales & Support” to find assistance near you at

<https://na.industrial.panasonic.com/distributors>

Please visit the **Panasonic Wireless Technical Forum** to submit a question at
