

# Supply Chain Impact Due to China's Coronavirus Epidemic

Dear DFI's Valued Customers,

During the Lunar New Year, the Wuhan Coronavirus outbreak has caused Chinese officials to extend the holiday. So far, they have entry and exit control for 34 cities in China and most of our suppliers are suspended to work till 2/10.

Although DFI factory is in Taiwan and none of our employees has any health concerns, it still affects our current supply chain including PCB and metal processing. Our HQ procurement is trying their best to keep material L/T on time or finding alternative parts in Taiwan and this will require time to search, validate and approve. Some delivery shifts are unavoidable and DFI will do our utmost to minimize the impact. If you have any 2020 forecast to share with us, it will help us to keep the L/T on schedule.

Sorry for any inconvenience caused. We will keep updating you by project.

At last, here is the news related to operation shutdown in China:
