**Re: Impact on Delta Thailand's Operation in Wellgrow Plant During Thailand's COVID-19 3rd Wave**

Dear Valued Customers,

Delta Thailand's Wellgrow Plant just now got the latest notification from the local (Chachoengsao) government. The government agreed to lift the restriction of interprovincial travel, which we ever mentioned on Jul 22, 2021. For this,

1. We are currently notifying our employees to continue to work next Mon, Jul 26.
2. Our production planning team will review production loading. It will take time to do the overall planning and review. Our sales team will keep you updated on this next week.

However, Thailand COVID situation is still not getting better. Today's confirmed case is another record high. Thus, government may still change the policy, depending on the real-time Covid situation. We will keep updating the situation here. Of course, the anti-Covid measures will continue and employees' safety is still our priority.

Delta Thailand thanks you for your attention and understanding and we will keep you updated accordingly, if there is further development to the current situation. Thank you.

Best Regards,

*Julius Lin*

Sr. Sales Manager
