Re: Suspension of operation of our Philippine's factory

We are grateful for your continued prosperity and thank you very much for your patronage of our products.

By the way, the Philippine government announced on March 17 to prevent the outbreak of novel coronavirus, it would greatly restrict people's movement till April 14 from the capital city of Manila to all the areas of Luzon island. Policeman and military soldiers' inspection have been strengthened.

In addition, at the area where our factory is located, numbers of companies have closed their factories in response of government's request to restrain production are increasing day by day. Government's restriction on movement has made it more difficult for employee come to work, procuring materials for productions, products shipment etc. Even our company, we have determined that it would be difficult to continue production further and decided to suspend the operation of factory from April 1. We are planning to restart the factory from April 15.

We have product inventory for time being, kindly contact our sales executives and distributors from respectively areas for future supply.

Thank you for your kind attention.
