COVID 19 impact – PRECI-DIP Swiss production site closure

Dear Valued Customer,

As you are probably aware, Switzerland has been seriously impacted by the COVID 19 virus. The Swiss government has announced several measures and restrictions to contain this epidemic and, in order to protect the health and well-being of our employees and their families, we are obliged to close the production site of Delémont Switzerland. This closure will be effective as of this evening, March 18th, 17.00 CET and we expect this will remain in effect until April 6th, 2020.

We will keep our management team, our product engineering, our customer care and sales force operating from home office. Your usual person of contact will be reachable.

We can expect that this news will have a certain impact on our ability to service you in these circumstances of force majeure.

All our employees and the management team thank you for your understanding and trust. We look forward to putting this difficult period behind us and a return to our very positive dynamic together.

Best regards,

Raymond Kerrison
CEO

Tanguy Tronel
Director R&D Sales&Marketing
