**COVID-19 (Corona Virus SARS-CoV-2) outbreak
TDK-Micronas supply & manufacturing status**

Dear valued customers

This letter is to inform you about the current status regarding potential effects of the Corona Virus outbreak for TDK-Micronas.

The production areas of TDK-Micronas group are in operation, additional precautionary measures and controlled workforce are still in place. We continuously assess the implications and potential impact on the supply chain regarding the Corona Virus outbreak. As of today's perspective, we still do not expect any significant impact on the supply chain or manufacturing status. There still may be some minor delays to our shipments due to the reduction in frequency of flights or due to busy cross-border trucking.

In general, TDK-Micronas is acting in accordance to the recommendations of the Robert Koch Institute and the given restrictions of the national Government. As the situation may be changing any hour we continue monitoring and adapting our activities accordingly.

Bernhard Huber, VP Sales

Andreas Ebner, Director Logistics
