

Defense & Aviation

V1.0

Resilient supply chains.
Strategic independence.
European focus.

Rutronik
„Defense & Aviation“

Expertise with substance and reliability

Rutronik is an internationally active distributor and established partner for electronic components and system solutions in demanding, regulated markets. Many years of experience, reliable processes, and a strong commitment to quality characterize collaboration throughout the entire supply chain. A significant part of the company's expertise lies in industries with the highest quality and safety standards. With more than 50 percent of revenue generated in the automotive sector, we build on a solid foundation for defense and aviation applications with long product life cycles and stringent regulatory requirements. Interdisciplinary teams from engineering, export, and compliance work closely together to reliably implement complex requirements, international regulations, and long-term supply concepts.

Quality, stability, and process reliability consistently define the benchmark for everything we do.

Our Product Portfolio

-  Semiconductors
-  Passive Components
-  Electromechanical Components
-  Displays & Monitors
-  Boards & Systems
-  Storage Technologies
-  Wireless Technologies

Vertical Markets

-  **RUTRONIK SOLUTIONS**
-  **RUTRONIK EMBEDDED**
-  **RUTRONIK POWER**
-  **RUTRONIK SMART**
-  **RUTRONIK AUTOMOTIVE**
-  **RUTRONIK IT ELECTRONICS**

Committed to excellence

Consult – Know-how. Built-in.

The Technical Competence from RUTRONIK

Worldwide and individual consulting on the spot by competent sales staff, application engineers & product specialists.

Components – Variety. Built-in.

The Product Portfolio from RUTRONIK

Wide product range of semiconductors, passive and electromechanical components, displays & monitors, boards & systems, storage and wireless technologies for optimum coverage of your needs.

Logistics – Reliability. Built-in.

The Delivery Service from RUTRONIK

Innovative and flexible solutions: from supply chain management to individual logistics systems.

Quality – Security. Built-in.

Quality without Compromise from RUTRONIK

The integrated management system (IMS) encompasses quality control, information security, environmental protection, occupational health and safety.

Rutronik – How we build success: trust, consistency and a reliable network

Leading in the European and on global distribution markets

More than 1,500 employees (2025)

Economic independency leads to objective expertise

Company turnover: ~ 1 billion € (2025)

Headquartered in Ispringen (Germany) with established representations and logistic centers in Asia and North America

Integrated logistics and management processes worldwide

Privately owned and independent since 1973

Over 130 billion components shipped per year to more than 40,000 customers worldwide

76 offices and 37 subsidiaries

Linecard with leading suppliers

RUTRONIK 24

Components & Solutions

Excerpt from the Linecard

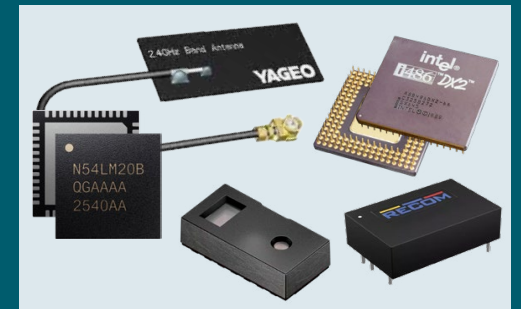

Rutronik builds on long-standing, trusted partnerships with leading manufacturers of electronic components and solutions. These close collaborations provide direct access to cutting-edge technologies and underpin a high-performance, broadly positioned portfolio.

As a reliable link between producers of high-quality components and manufacturers of advanced systems, Rutronik delivers a comprehensive linecard and tailored solutions for safety-critical applications.

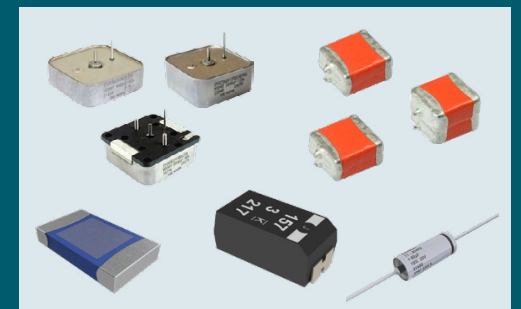

Technological expertise, transparency, and long-term availability define our approach.

Supply Chains & Security

In safety-critical and highly regulated markets such as Defense & Aviation, security of supply is a decisive success factor. With decades of experience, Rutronik manages a wide range of logistics models and complex, demanding supply chains engineered for stability, transparency, and long-term predictability.

We ensure security of supply across the entire product lifecycle: through long-term availability strategies, structured obsolescence management, and full end-to-end traceability. The result: minimized risk and dependable supply, even across long project horizons.

Expertise & Support

Rutronik supports defense and aviation projects across the entire lifecycle: from early development and design support to long-term, reliable supply.

Dedicated teams act as expert points of contact, enabling customers to address technical, regulatory, and logistical requirements early and implement them efficiently.

Comprehensive FAE expertise, deep technical know-how, and relevant certifications provide the foundation for structured lifecycle management ensuring consistent supply reliability across long and demanding project timelines.

Compliance & Export Control

Compliance and export control are firmly embedded in Rutronik's business processes. Established structures and clearly defined procedures ensure that regulatory requirements are consistently met and reliably executed. In highly regulated, safety-critical markets, this reliability forms a vital foundation for trust and planning certainty.

Rutronik translates complex national and international regulations into practical, transparent, and secure processes ensuring strict adherence to all relevant requirements: from classification and licensing to comprehensive documentation.

With extensive international experience, Rutronik possesses in-depth expertise in both European and U.S. regulatory frameworks and their differences. This enables the company to guide customers with confidence and deliver reliable, fully compliant solutions, even under the most demanding export control requirements.

Focus on European Customers

As a European distributor, Rutronik remains closely aligned with the needs of European customers, actively strengthening resilient and independent supply chains. Full compliance with European laws and regulations, combined with a strong regional presence, ensures legal certainty and transparency, particularly in safety-critical applications within highly regulated markets.

In times of geopolitical uncertainty or supply constraints such as those driven by prioritization of shipments to the U.S. market under "America First" policies this focus helps safeguard stable and reliable supply. In doing so, Rutronik supports strategic independence and long-term planning certainty for European customers even amid global shortages and increasing market pressures.
