

Resettable Fuses – PPTCs

V2.0

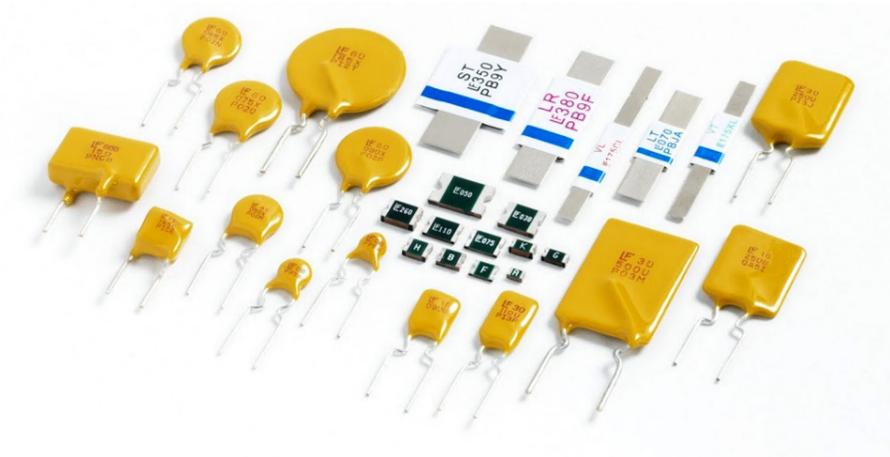

Rutronik and Littelfuse – a Strong Partnership

With Littelfuse Rutronik is sharing a long term partnership with one of the market leaders in the field of circuit protection components. As a result of the wide product portfolio and the high innovation grade of Littelfuse we are able to offer a suitable product for all kinds of challenges.

Committed to Excellence

Consult – Know-how. Built-in.

The Technical Competence from RUTRONIK
Worldwide and individual consulting on the spot: by competent sales staff, application engineers and product specialists.

Components – Variety. Built-in.

The Product Portfolio from RUTRONIK
A wide product range of semiconductors, passive and electro-mechanical components, displays/ monitors, boards & systems, storage and wireless technologies for optimum coverage of your needs.

Logistics – Reliability. Built-in.

The Delivery Service from RUTRONIK
Innovative and flexible solutions: from supply chain management to individual logistics systems.

Quality – Security. Built-in.

Quality without Compromise from RUTRONIK
The integrated management system (IMS) encompasses quality control, information security, environmental protection, occupational health and safety.

Resettable Fuses – PPTCs

Due to increasing demands for electronic components in more and more ambitious applications, the protection of these systems has become very important. Especially in cost intensive applications a reliable overcurrent protection has to be ensured. A right circuit protection has therefore a direct influence on the correct function of the application and on its long life cycle and quality. Wherever a replacement of the protection components in case of need is not possible, the use of resettable fuses is indispensable.

Another key role plays miniaturization. The available space on a circuit board is limited for which reason the protection device has to meet this requirement as well. Littelfuse offers a full range of surface mount, radial leaded and axial leaded (battery strap) PPTC resettable overcurrent suppression devices. Surface mount PPTCs are available with broad range of hold current from 0.05 to 9.0 A while footprint varies from 0402 to 2920.

Radial PPTCs are rated from 6 to 600 V_{DC} respectively, and are designed for use in higher voltage applications that require minimal maintenance and are subject to repetitive overcurrent conditions.

Axial PPTCs are rated from 6 to 30 V_{DC} and are designed for use in battery pack applications that require thermal protection against overcurrent fault conditions. All Littelfuse PPTC devices are recognized under the Components Program of Underwriters Laboratory for both the US and Canada as well as being certified by TUV. All devices are lead free and RoHS compliant.

Littelfuse: Everywhere, Every Day

Founded in 1927, Littelfuse has become the world's most respected circuit protection brand, with well-established and growing platforms in power control and sensing technologies. Today, we are a global company, offering a diverse and extensive product portfolio - fuses, semiconductors, polymers, ceramics, relays, sensors, and more - serving the electronics, automotive and industrial markets. Each is manufactured to exacting quality standards and backed by an unwavering commitment to technical support and customer service. Our history of innovation, combined with our customer-first culture, drives us to collaborate with you to develop safer, more reliable products that are energy efficient and compliant with global regulations. We will partner with you to solve complex problems wherever electrical energy is used, bringing design, engineering, and technical expertise to deliver business results.

Why Choose Littelfuse

Littelfuse is the global leader in circuit protection solutions. We are the only company to offer all of the pertinent circuit protection technologies, with products that can be used in virtually everything that uses electrical energy. Complementing our wide portfolio of circuit protection products is a global network of design and technical support expertise. We offer decades of design experience to help you address application challenges and achieve regulatory compliance.

Your Single Source

Littelfuse offers an extensive circuit protection product line. We design forward-thinking, application-specific solutions to provide assurance that your most demanding requirements will be met. Our goal is to provide the most complete range of options so that you will not have to compromise.

Testing Support

Littelfuse can help ensure that your products will withstand most common threats repeatedly and will fail safely under extreme circumstances. We can serve as an independent source to provide assistance as you design by offering lab testing capabilities for customer applications. This testing includes industry-specific required power fault and Electrostatic Discharge (ESD)/ Electrically Fast Transients (EFT)/ lightning surge conditions.

Application Knowledge

For over 90 years, Littelfuse has maintained a focus on circuit protection, and we will continue to adapt as technologies evolve. Engineers and circuit designers around the world have come to rely on Littelfuse products and application knowledge to support their designs.

Global Support

Littelfuse stays close to customers. With manufacturing, lab, and design facilities located around the globe, application knowledge and technical support are locally available. Also, we offer a network of regional customer support offices and hundreds of independent authorized distributor contacts to assist you. Visit Littelfuse.com/contact-us to find local support near you.

Standards Compliance Expertise

Most Littelfuse products comply with a wide range of applicable industry and government guidelines as well as our own rigorous quality and reliability criteria. We continually look forward and adapt to changing requirements so that our products will comply with industry - specific national and international standards, such as CCC, CSA, IEC, IEEE, ISO, ITU, Meti, RoHS, Telcordia, TIA and many more.

Operational Excellence

With our global manufacturing footprint, Littelfuse is firmly committed to manufacturing quality products at a competitive price. We build quality into our products and services, striving for zero defects in everything we do, thereby reducing cost and increasing your total satisfaction. We strive to exceed your expectations every day.

Quality Assurance

Our global manufacturing facilities abide by strict quality assurance requirements and hold the following quality management system registrations: ISO 9001, ISO14001, IATF 16949

How is the PPTC used here?

ASMD & miniASMD Surface Mount Resettable PPTCs

Resettable PPTC overcurrent protection helps prevent system breakdowns and enhances safety. Surface mounted automotive PPTCs safeguard a wide range of functions such as powered antennas, CANbus, touchscreens, USB ports, HDMI ports, and I/O lines.

How is the Mini-Breaker used here?

MHP-TA Metal Hybrid PPTC Devices

Mini-breakers provide resettable overtemperature and over-current protection in high-capacity Li-ion polymer and prismatic cells. They are capable of handling the high battery-discharge currents in notebook PCs, gaming PCs, ultra-books, tablets, smartphones, and other small portable electronic devices.

Five Good Reasons for Choosing Rutronik24

Order online and receive personalised on-site support. We offer Catalog, Procurement, Mass Quotation and Product Change Notifications.

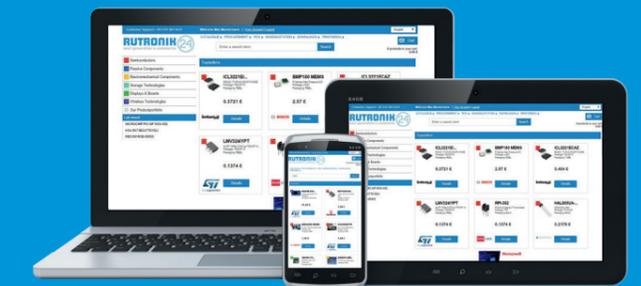

Advantages

for Developers

- Search and filter according to a maximum of 12 technical parameters
- Full text and part number search
- Data sheets, product links, application manuals
- Alternative replacement items suggested, e.g. with discontinued components

for Buyers

- Quotation request or direct ordering with the delivery and payment conditions agreed with Rutronik
- Position your complete component list in the mass quotation tool and receive a complete offer
- Direct contact with your Rutronik contact person – worldwide

Visit us at
www.rutronik24.com

1. Personal Support You Got it.

With Rutronik24 we have created a modular platform that significantly simplifies your business processes. The advantages of rapid online orders are combined with a personal advisory service, tailored to your needs. This has not replaced our personal service; on the contrary: We are adding to it.

2. Catalog All Roads Lead to Us.

Are you looking for a particular electronic component? Our Rutronik24 catalog will guide you reliably to the right choice: Our Product Groups Search will enable you to find the product you are looking for in a maximum of three steps. The product groups are divided into semiconductors, passive and electromechanical components, storage technologies, displays & boards as well as wireless technologies. Using the full-text and part number search, you can select results after entering parts of the product or manufacturer's name.

3. Procurement Everything at a Glance.

The Rutronik24 "Procurement" module provides you with a complete overview of your orders, item lists, stocks, contracts and delivery times. You can conveniently download all the lists in Excel format and import them into your inventory control system, for example. Take the opportunity to save time.

4. Mass Quotation Everything in Just a Few Seconds.

Rutronik24 offers you the opportunity to access all the information about our products very quickly. We have developed the "Mass quotation" tool for the fast and simple evaluation of your individual material. Upload your comprehensive item lists to our system in one file and this will then be returned to you, complete with current prices and additional information, just a few moments later.

5. PCN Everything from a Single Source.

Be fully informed of changes. Our Rutronik24 "PCN" module keeps you up-to-date with current product changes from our manufacturers. Not only do you have access to an extensive PCN database, but the product changes are also linked directly to the respective product. This gives you the opportunity to react in good time to the changes.
